

## **ACKNOWLEDGEMENT**

The development of the Scoping Study of the State of Marine Spatial Planning (MSP) in Tanzania has been made possible by commitment, dedication and collective efforts of key stakeholders. On behalf of the Government of the United Republic of Tanzania (URT) I would like to express my sincere gratitude to the German Government Federal Ministry for Environment and Nuclear Safety through the International Climate Initiative (IKI) for the financial support. Likewise, I would like to thank The Nature Conservancy (TNC) and the Commonwealth Scientific and Industrial Research Organization (CSIRO), Australia for their technical support.

I also wish to express my sincere appreciation to the experts from the Vice President's Office (URT), the Ministry of Blue Economy and Fisheries in the Revolutionary Government of Zanzibar, relevant key ministries, departments and agencies, research and academic institutions, blue economy development partners and non-governmental organizations who participated diligently throughout the process in the development of this report. As part of the methodology, specific individuals were interviewed and consulted and we acknowledge their valuable contributions that has enriched the document.

The Vice President's Office is committed to ensure that stakeholders will benefit immensely from the findings presented in this scoping study and find it useful. It is my hope that this report will form the basis and prepare the URT for establishment of a Marine Spatial Planning Framework for the URT which will facilitate her pursuit of a sustainable Blue Economy.

Mary Ngelela Maganga  
Permanent Secretary
